

Glenrath Soy Sourcing Policy

Glenrath Farms is committed to reducing its impact on the environment and will act to continuously improve the sustainability of the ingredients that are sourced through our approved feed suppliers.

Soy is an important source of high quality protein used extensively in poultry feed. It is also associated with forest loss and destruction of natural habitats.

Glenrath are committed to ensuring the soy we use is cultivated in a responsible and sustainable manner and we are fully supporting the Deforestation and Conversion Free transition through our sourcing.

Our feed suppliers are also members of the UK Roundtable on Sustainable Soy, signatory to the Cerrado Manifesto Statement of Support and Soya Moratorium which protects the UK market from soya being grown in the Amazon on deforested land since 2009.

We are working in agreement with our supply chain to ensure all shipments of soy to the UK are Deforestation and Conversion Free (DCF) by 2025.
